Rates and Charges as per by-law 2010-188, as amended or replaced**

*Note: Fees in this Part are not subject to HST*

**Discharge Surcharge Rates**

Overstrength Sewage Discharge Agreement:

The surcharge for Overstrength Sewage under an Overstrength Sewage Discharge Agreement shall be calculated in accordance with the following formula:

$$S(dT) = WCC * WWR * V(dT) \left\{ 0.30 \left( \frac{TSS}{350} \right) + 0.15 \left( \frac{BOD_5}{300} \right) + 0.10 \left( \frac{TPC}{1} \right) + 0.40 \left( \frac{TP}{10} \right) + 0.05 \left( \frac{TKN}{100} \right) \right\}$$

Where	S(dT)	Wastewater Surcharge in dollars;
	WCC	Water Consumption Charge as provided in Schedule A to By-Law 201X-XXX;
	WWR	Wastewater Rate as provided in schedule A to By-Law 201X-XXX;
	V(dT)	Total Volume, in cubic metres, released during time interval dT;
	TSS	Average Total Suspended Solids in milligrams per litre as determined by lab testing during time interval dT;
	BOD <sub>5</sub>	Average five-day Biochemical Oxygen Demand in milligrams per litre as determined by lab testing during time interval dT;
	TPC	Average Total Pheonolic Compounds in milligrams per litre as determined by lab testing during time interval dT;
	TP	Average Total Phosphorous in milligrams per litre as determined by lab testing during time interval dT; and
	TKN	Average Total Kjeldahl Nitrogen in milligrams per litre as determined by lab testing during time interval dT.

**Note:** If any of the quotients given in the above equation are less than or equal to 1.0, then that expression defaults to zero. For Instance:

if TSS = 20 such that  $\frac{TSS}{350} = 0.57$  which is less than 1, then  $\frac{TSS}{350}$  is set to 0.

Sanitary Sewer Discharge Agreement - Surcharge:

The surcharge payable for the discharge to the sanitary sewer of wastewater originating with water not from the City's water supply system shall be calculated in accordance with the following formula:

$$VWC(dT) = WCC * WWR * V(dT)$$

Where	VWC(dT)	Volumetric Wastewater Charge, in dollars, covering the time period (dT) in question;
	WCC	Water Consumption Charge per cubic metre as provided in the Schedule A to By-Law 201X-XXX.
	WWR	Wastewater Rate as provided in Schedule A to By-Law 201X-XXX
	V(dT)	Total Volume, in cubic metres, released during the time period (dT) in question.
